

ALTERNATIVE FAMILY TREES

THE FAMILY PYRAMID

The Family Pyramid is an easily adaptable form. As in the small example on the right, put your name (and place and date of birth) in the bottom level. In the levels above, place as many or as few dividers as you wish. For example, you can write one name in the entire space of the next level up, or divide it in half and name two parents. Or divide it in three and name parents and stepparents; adoptive and birth parents; etc.
